

Product Brief | Evidence Disc System™

Streamline your evidence workflow

Built on the Rimage Producer™ 8100N and Professional™ 5400N disc publishing platforms, Evidence Disc Systems™ (EDS) are the industry's highest-performing, most reliable solution for automatically publishing CDs, DVDs and Blu-ray Discs™ for evidence preservation and distribution.

Combining optical disc technology with advanced software and integration, the EDS is a multi-function device designed for law enforcement workflows. Automatically collect, copy, review and export digital evidence to standardized and portable disc media—drastically reducing time spent on manual processes.

Benefits

Multifunctionality in a single package

Automatically ingest, publish and archive digital evidence from a wide range of sources with one hands-free system. Quickly create court-approved copies of evidence using the walk-up, touchscreen interface.

Streamlined workflow

Connect an Ethernet cable and you're on the network—single users or workgroups have full access to the EDS for workflow integration and custom solution development.

Intuitive interface

Produce one or many copies of evidence as easily as printing to the office printer. Rimage's thermal retransfer technology permanently prints case information directly to the disc in under a minute, improving traceability.

Features

- 8100N/8100NF EDS: robust capacity and increased production capabilities
- 5400N/5400NF EDS: full functionality in a compact design
- Integrated PC
- Integrated high resolution digital camera
- Everest™ thermal retransfer printing
- LCD interface displaying system status
- Touch screen interface (5400N and 8100N only)
- Front USB port (5400N and 5400NF only)
- Standardized, portable, secure CD/DVD/BD media
- Integration with Rimage solution software
