Requirements, Compatibility Information and Upgrade Instructions

Requirements

Rimage 2000i Software Version 8.2 requirements include:

- The Windows installation is only supported on Windows XP Professional SP3, Windows Vista Business with SP1 and Windows Server 2003 SP2 platforms.
- Rimage 2000i Software is not supported on 64-bit versions of Windows Operating Systems.

Rimage 2000i Software Version 8.2 does not require user activation.

Compatibility

- **Label files**
CD Designer label files from version 6.20 and higher can be opened with CD Designer 8.01 and saved to the 8.01 format. Rimage recommends updating all CD Designer software to CD Designer 8.01.

Installing or Upgrading Your Software

To install your new software, refer to the Setup and Installation instructions included with your Rimage Autoloader or Printer. The Setup and Installation instructions for your product are also available at www.rimage.com/support.

- If you are upgrading your software and you have modified the default QuickDisc templates, rename the templates folder before installing client applications. If you do not rename the templates, they will be overwritten during the client installation.
- Printer, recorder, and autoloader firmware is not automatically updated when you update your software. After you install your new software, visit www.rimage.com/support to check for firmware updates and service packs. To view information about the latest firmware and software updates, your products support page.

Changes to Rimage 2000i Software Components

QuickDisc

Support and Functionality Provided

- Resolved an issue where, when a write failure occurred, the system did not attempt to write the data again. (Rimage reference #8308).
- Resolved issues specifying multiple copies when merge files have a single record. (Rimage reference #8299).
- Resolved an issue that did not allow data verification to begin while another disc was being printed. (Rimage reference #8341).
- Resolved an issue with the JobLog in the PerfTrack database that caused multiple pause counts and overlapped pause times on jobs that use multiple recorders. (Rimage reference #8539).
- Set default recording speed for CDs to 52x and DVDs to 16x, to improve media compatibility. (Rimage reference #8888).
- Resolved an issue where an error displayed when attempting to record 90-100 minute CDs. (Rimage reference #8437).
- Resolved an issue where audio CDs were only read at 4x on AD-5170A and AD-5200A recorders. (Rimage reference #8446).
- Resolved an issue where a media type configuration caused discs to load on startup (Rimage reference #8900).

New Features in Version 8.2

- Printer drivers used in conjunction with Windows XP Pro SP3 are now signed. (Rimage Reference #4096)
- Added the ability to compare and verify audio content (Rimage reference #8561).
- Added the ability to use Unicode merge files. (Rimage reference #8383).
- Added the ability to specify pre-defined merge fields. (Rimage reference #8337).
- Added the ability to verify UPC/EAN and ISRC on audio discs. (Rimage reference #8582).
- Rimage 2000i software now runs on Windows Vista Business Edition SP1 operating system. (Rimage reference #6127).
- Improved disc encryption feature including the ability to assign passwords to .zip images (Rimage reference #8690).
- Added the ability to preview .pdf files in QuickDisc if Adobe Reader is installed. (Rimage reference #6071).
- Added the ability for QuickDisc to generate SHA-1 and MD5 Hash Values to be utilized during verification. (Rimage reference #8402).
- Added the ability to use merge fields in .pdf labels.
- Added the ability to include split points when using DVD+R DL.
- Added the ability to use UDF 2.0 and 2.5 image types for DVD discs. (Rimage reference #8348).
- Added support for Joliet SVD when retrieving disc title or volume ID during Image to Disc projects. (Rimage reference #8358).
- Added the ability to specify DVD media codes. (Rimage reference #7368).
- Added ability to set a threshold after which orders are not processed if there is not enough ink remaining to print the labels. (Rimage reference #7368).

CD Designer

Rimage 2000i software includes CD Designer 8.0 (v. 8.01.2551).
